SCIENTIFIC PROGRAMME

SPECIAL GUEST: PHILIPPE HERMAN

Lariboisier Hospital
University Diderot - Paris

DAY 1

- 07:00 - Registration of participants
 07:15 - Surgical cases presentation
 07:30 - Endoscopic surgical anatomy of the skull base
 08:30 - Live surgery & debate
 12:30 - Imaging: Radiological anatomy and differential diagnosis of different skull-base lesions
 13:00 - LUNCH
 14:00 - Video-guided step-by-step dissection
 - Rescue flap and parasagittal sphenoidotomy
 - Intradural sphenoid flap
 - Transplanul, transtuberulum, transellar approaches
 - Draf type III
 19:00 - Closing Remarks

Logo of the University of Insubria

DAY 2

- 07:00 - Surgical cases presentation
 07:15 - Multiportal approaches to the skull base
 08:30 - Live surgery & debate
 12:30 - Endocrinologic management of pituitary lesions
 13:00 - LUNCH
 14:00 - Video-guided step-by-step dissection
 - Transcribriform approach
 - Endoscopic partial maxillectomies
 - Transpterygoidal approach to the cavernous sinus
 19:00 - Closing remarks

DAY 3

- 07:00 - Surgical cases presentation
 07:15 - Management of skull base complications
 08:30 - Live surgery & debate
 12:30 - Skull base reconstruction techniques
 13:00 - LUNCH
 14:00 - Video-guided step-by-step dissection
 - Transclival approach to the posterior cranial fossa
 - Transantral approach to the infratemporal fossa
 - Transorbital approaches to the skull base
 18:00 - Final test
 19:00 - Take-home message and closing remarks

The advanced three-days lasting workshop is grounded on sessions of live surgery, lectures and anatomical dissection. After the presentation of the daily clinical cases, participants will attend live surgery projection and will debate the surgical procedures directly with the surgeons. Lectures will relate on skull base surgical anatomy (macroscopic, endoscopic and radiologic) and specific surgical techniques. Afternoon sessions of step-by-step tutor-guided anatomical dissection will complete the course. This course is addressed to physicians dealing with skull base pathology (ENT, neurosurgeons, maxillo-facial surgeons) who desire to deepen their knowledge of the endoscopic skull base techniques. Teaching material in digital format will be given to the participants at the beginning of the course in order to study individually the topics of the course and be able to face the final exam. Participants that attend the three-day course and pass a final examination, will receive the Post Graduate University Diploma **in Endoscopic Skull Base Surgery**, of the University of Insubria in Varese.
